Critical Career Fields

Crew Chief 2A5X1

Take control of your Air National Guard experience and take the lead as a C-130 or C-17 crew chief. They pave the way for other mechanics by coordinating all maintenance.

Helicopter Maintenance 2A5X2

These are the guys who maintain, launch and recover their Helicopters in a way that has made them the premiere Rescue unit in the World. Their mission saves lives everyday!

Integrated Avionics 2A5X3

As an avionics technician you'll gain electronics repair skills and the experience needed to step into many aviation, computer, and telecommunication jobs. Qualified technicians are in steady demand to maintain electronic counter measures, FLIR, GPS, flight director, radar, communication, auto-pilot, and navigation equipment, both in the National Guard, and in the civilian market. Stay on the cutting edge of a constantly evolving industry as an avionics technician!

Engine Mechanic 2A6X1

Release your inner gearhead as an Engine Mechanic! Work jet & turbine engines in a modern facility and in the fast paced flight line environment while gaining the experience you'll need for a civilian Airframe & Powerplant license.

Aircraft Hydraulics 2A6X5

Find the strength to move mountains as an Aircraft Hydraulic Systems Mechanic! Rebuild and modify components that give the aircraft direction, such as flight controls, landing gear and other subsystems. Overhaul and test vital rescue assets, like in-flight refueling reel assemblies. It takes a hydro mechanic to make an airplane fly!

Non Critical Career Fields

Aerospace Ground Equipment 2A6X2

Aircraft Electrical 2A6X6

Fuel Systems 2A6X4

Metals Technology 2A7X1

Munitions 2W0X1

Non Destructive Inspection 2A7X2

Structural Specialist 2A7X3

Weapons 2W1X1
